# CARATTERISTICA DEL CAVO PER IL COLLEGAMENTO DI UN BUS SERIALE RS 485

## CONSULTARE LA GUIDA RHOSS COD H58565

# CHARACTERISTICS OF THE CABLE FOR THE CONNECTION OF A RS 485 SERIAL BUS

## CONSULT THE RHOSS GUIDE COD H58565

### 2. Caratteristiche del cavo

Lo standard RS-485 definisce le seguenti specifiche del cavo da utilizzare:

- Cavo con coppie di conduttori intrecciati
- Impedenza caratteristica: 100-130 Ω
- Capacità distribuita tra i conduttori: < 100 pF/m
- Capacità distribuita tra i conduttori e la schermatura: < 200 pF/m
- Schermatura metallica in foglio laminato o intrecciato
- Lunghezza massima del segmento: 1219 m

Il cavo tipicamente consigliato ha:

- Una **impedenza** caratteristica pari a 120 Ω @ 100 kHz
- Una **capacità** inferiore a 30 pF/m
- Una **sezione** del conduttore minima AWG 24.

A titolo puramente esemplificativo vengono riportati i seguenti codici commerciali che rispondono alle caratteristiche richieste:

| Marca/Modello          | AWG | N° coppie |
|------------------------|-----|-----------|
| Belden 9841            | 24  | 1         |
| Belden 9842            | 24  | 2         |
| Belden 8103            | 24  | 1         |
| Madison/Tyco 02KFK0003 | 24  | 1         |
| Belden 3105A           | 22  | 1         |
| Belden 3106A           | 22  | 1,5       |
| Belden 3107A           | 22  | 2         |
| CommScope 5090         | 22  | 1         |
| Belden 3074F           | 18  | 1         |
| Belden 9860            | 16  | 1         |

### 2. Cable characteristics

The RS-485 standard defines the following cable specifications to be used:

- Cable with twisted pairs of conductors
- Characteristic impedance: 100-130 Ω
- Distributed capacity between the conductors: <100 pF/m
- Distributed capacity between conductors and shielding: <200 pF/m
- Metal shield in laminated or braided sheet
- Maximum segment length: 1219 m

The typically recommended cable has:

- A characteristic **impedance** equal to 120 Ω @ 100 kHz
- A **capacity** lower than 30 pF/m
- A minimum conductor **section** of AWG 24.

By way of example only, the following commercial codes meeting the required characteristics are reported:

| Brand/Model            | AWG | Pairs # |
|------------------------|-----|---------|
| Belden 9841            | 24  | 1       |
| Belden 9842            | 24  | 2       |
| Belden 8103            | 24  | 1       |
| Madison/Tyco 02KFK0003 | 24  | 1       |
| Belden 3105A           | 22  | 1       |
| Belden 3106A           | 22  | 1,5     |
| Belden 3107A           | 22  | 2       |
| CommScope 5090         | 22  | 1       |
| Belden 3074F           | 18  | 1       |
| Belden 9860            | 16  | 1       |

|      |                                     |          |          |             |        |             |
|------|-------------------------------------|----------|----------|-------------|--------|-------------|
